🧠 Intelligence Snapshot

Domain Detected	Anomaly Pressure	Unified Intelligence Score
Finance	5.0%	-27491.92

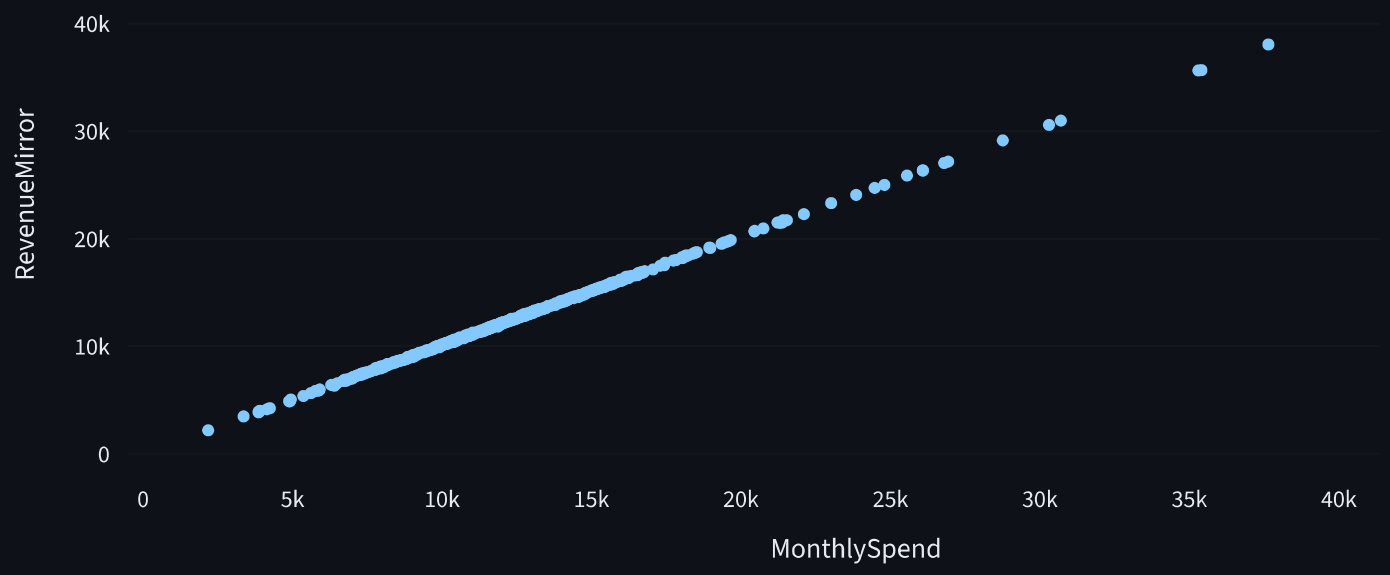
Domain Confidence	Stability Index
100.0%	-68876.04

Identifier columns excluded from modeling: TimeIndex, MarketingSpend, MonthlySpend, SessionDurationMinutes, DiscountRate, RevenueMirror

Forecast stability is weak — strategic caution advised.

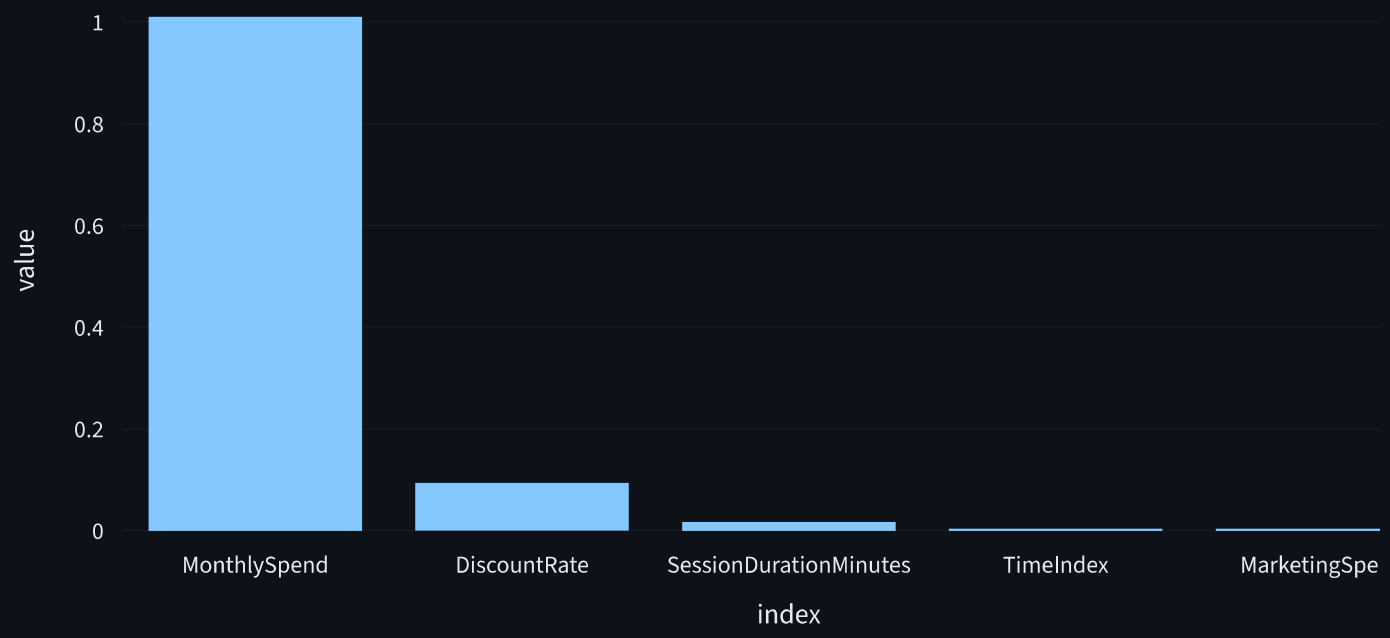
📊 Adaptive Visual Intelligence

Key Structural Relationship

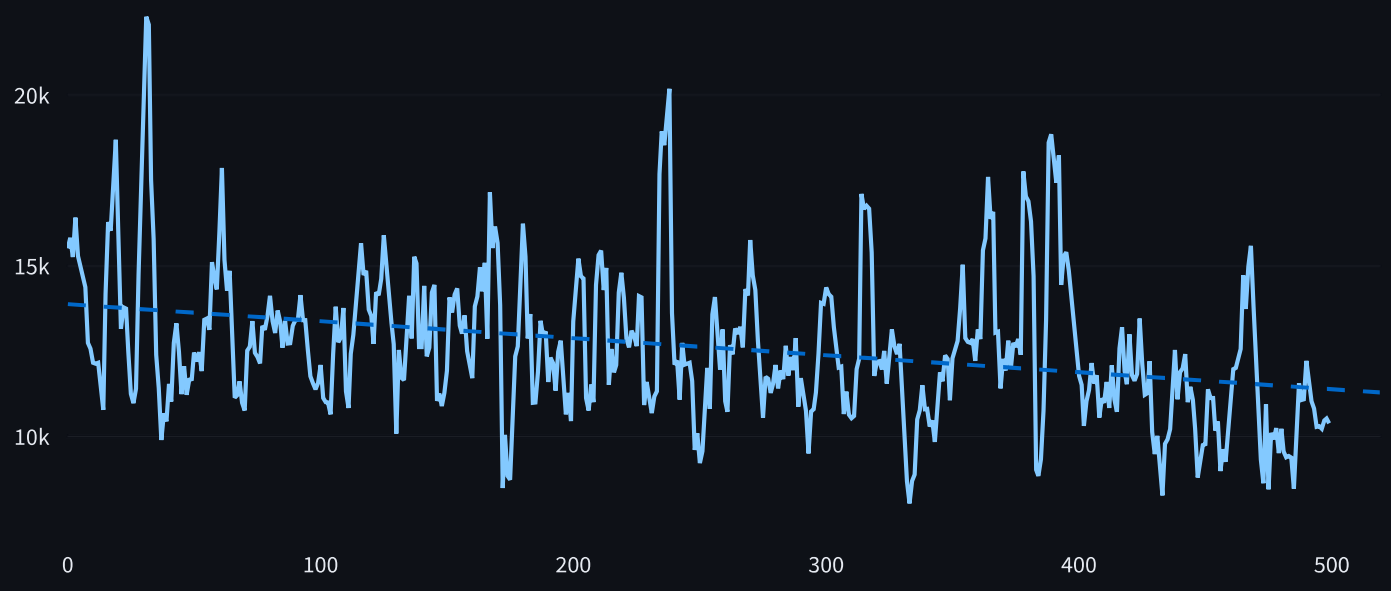


A strong structural dependency is visible between two core variables (correlation ≈ 1.0). This indicates measurable performance alignment.

Performance Driver Influence



Linear Regression modeling identifies MonthlySpend as the dominant performance driver.



Forecast projects a downward movement of approximately -18.64%.

📦 Strategic Recommendation Box

- Focus on strengthening dominant drivers while minimizing volatility exposure.
