Key Analysis

Selected Model: Linear Regression

Model Confidence: `-0.0173`

Stability Score: `0.9862`

Top Positive Drivers

✅ **Department_Unknown** → Impact: 0.211

✅ **Age** → Impact: 0.068

Top Negative Drivers

⚠️ **Department_IT** → Impact: 0.428

⚠️ **Department_HR** → Impact: 0.293

Risk Score

`0.006`

🔷 Strategic Recommendations

📈 Consider leveraging 'Department_Unknown' as it shows strong positive influence.

⚠️ Review and stabilize 'Department_IT' to reduce negative impact.

⚠️ Review and stabilize 'Department_HR' to reduce negative impact.

🛠️ Model signal strength is moderate; interpret findings with analytical caution.

Confidence Advisory: Analytical confidence is limited; cautious interpretation advised.
